There are many ways to optimize your costs and improve your take home profit. That might be why you’ve considered limiting the brand of credit cards you accept, or even accepting them at all, at your business. However, when over 70% of Americans prefer to use a card*, you know that credit cards are considered just another cost of doing business in today’s market. If you think there has to be a middle ground between no cards or no savings, you’re right. And Credit Card Cost Control (C4) may just be the answer for your business.

Our zero-cost acceptance program makes your cost for credit card acceptance free. How? By charging the cardholder, instead of your business, a surcharge fee on every credit card transaction at the time of sale. No matter the credit card, you can reliably accept credit card payments without thinking about the cost to your business.

Plus, with C4 you get a flat-rate debit card acceptance cost of just 1% + $0.25 per transaction. All you need to get started is either a Tetra terminal, or an eCommerce site supported by one of Converge integrations. Take charge, literally and figuratively, with confidence through the predictability of our C4 pricing program.

*CreditCards.com, 2017
Zero-cost credit card acceptance is now possible.

Supported Regions
All United States regions except for:
• Colorado
• Connecticut
• Kansas
• Maine
• Massachusetts
• Oklahoma
• Puerto Rico

Supported Stand-alone
• Tetra Desk3500
• Tetra Desk5000
• Tetra Move5000

Supported Card-Not-Present Converge Implementations
• Hosted Payments Page
• XML API
• Buy Button
• Virtual Terminal
• Checkout.JS

Processing Details
• C4 works on all major credit card brands
• Debit card transactions are always 1% + $0.25
• Fee only charged if a cardholder uses a credit card. C4 does not apply to debit cards or government-issued prepaid cards.
• If a return is issued on a C4 transaction, a proportional amount of the fee will be returned as well.

We make it possible. You make it happen.

Sample of surcharge on: (1) a terminal and (2) receipt for a card-present sale, (3) screen on an eCommerce platform
